# RiskCheck Interactive for Schools

## SchoolCheck: Successful Health & Safety

### How SchoolCheck Operates

SchoolCheck uses a combination of experienced Health & Safety Consultants, technology, and on-going support, to provide a real time process to enable schools to manage Health & Safety effectively at all times. Our consultants will initially meet with all of those responsible for Health & Safety for the school, to review the current policies and procedures. We will then carry out an initial

risk assessment of the School and its grounds, accompanied by members of the facility, to ensure that all areas are covered during the assessment.

### The SchoolCheck Site

We will then build a site specific system for managing and remediating risks, By putting a list of monthly school specific tasks/questions on an interactive platform, we can determine that all risks and potential risks are addressed.

### In House Support

To further re-enforce the risk management process, we have a team of Health & Safety specialists to provide on-going support and advice throughout the year.

### Annual Reviews

In future year's our Health & Safety Consultant will do an annual review to determine progress, and also ensure that any new issues are covered, as Health & Safety compliance is a process that requires constant monitoring.

Take the guesswork out of Health & Safety legislation

# RiskCheck Interactive for Schools

SchoolCheck is tailor-made to suit each School. Initially, a risk assessment is conducted of the School. As soon as the system is ready, users are provided with full training on how to optimize its benefits.

## Key System Elements

- Co-ordinate and monitor Health & Safety performance in real time
- Reminder of legislative requirements through system questions
- Provides due diligence record of Health & Safety activity
- Online legislation and reference library
- Ensures uniformity of Health & Safety management procedures for all School buildings
- Assistance with Health & Safety policy and management procedures
- Monitor compliance at the School

## Key Benefits

- Total ability to identify, control and manage Health & Safety risks
- Identification of 'non-compliance' issues allows you to initiate a plan to address hazards
- Helps achieve compliance with legislation in a cost effective manner
- Secures continual improvement in Health & Safety management
- Ensures uniformity of Health & Safety management procedures throughout the school
- Access to expert Health & Safety resources
- Boosts the School's reputation for Health & Safety management.

*“Managing risk in education is a large and important undertaking, mainly because of several key factors; the sheer number of risks and hazards, vulnerability of the clientele, expectations from parents and the public, and transparency of operations.”*

Carol Hall, “Managing Risk in Education.”  
Dialogue Online Our Kids Media November 2009.
